1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 3, the structure of the second piston rod is not understood in view of the specification (last paragraph of page 8) and drawings. The piston area is not understood in view of the specification and drawings.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second piston rod and the piston area as set forth in claim 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 4, and claim 4, line 7, "having piston rods" should be --each having a piston rod--.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set

forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Junkers ('865) in view of Berneuil et al.

Junkers ('865) discloses all of the claimed subject matter except for having two

pistons in a single cylinder. Berneuil et al discloses having two pistons in a single

cylinder. Berneuil et al further discloses a solid piston rod extending through a hollow

piston rod. It would have been obvious to one having ordinary skill in the art to form the

pistons/cylinders of Junkers ('865) as two pistons with a solid piston rod extending

through a hollow piston rod in a single cylinder to minimize the bulk of the cylinder as

taught by Berneuil et al.

7. Applicant's attention is directed to the Advisory Action, previously mailed. It is

noted that the amendment filed March 13, 2003 has not been entered. Applicant has

not requested entry of the previously non-entered amendment, nor has applicant filed a

preliminary amendment.
